Professional Summary

Full Stack Developer and Backend Engineer with 4+ years of experience building scalable web applications, APIs, AI-powered workflows, and cloud-based services. Experienced in designing and maintaining backend systems using NestJS, Django, Python, TypeScript, PostgreSQL, and Supabase, with strong expertise in API development, microservices architecture, and asynchronous job processing. Proven track record of delivering production-grade software, integrating LLMs and conversational AI platforms, optimizing application performance, and implementing reliable observability and deployment practices using Docker, CI/CD pipelines, and monitoring tools. Passionate about building intelligent software solutions that improve business operations and customer experiences.

Professional Experience

LeadAI – Remote, Australia

Backend Engineer (June 2025 – June 2026)

- Designed and enhanced REST APIs and backend services using NestJS, TypeScript, PostgreSQL, and Supabase.
- Developed microservices and BullMQ workflows supporting CRM automation, task orchestration, and conversational AI.
- Integrated LLMs, Vapi, Ultravox, Twilio, and ElevenLabs for AI-driven voice and communication workflows.
- Improved production reliability through Docker-based deployments, observability, logging, and monitoring.

BPOSeats – Cebu, Philippines

Full Stack Developer (August 2022 – June 2025)

- Engineered and optimized Django applications with PostgreSQL, enhancing query performance by 50% through ORM tuning and indexing.
- Created, maintained, and enhanced responsive user interfaces using Bootstrap, HTML, CSS, and JavaScript.
- Integrated RESTful APIs in frontend features built with Vue.js, including dynamic forms and real-time updates.
- Applied web accessibility and responsive design principles across devices and browsers.
- Managed version control, code reviews, and CI/CD workflows using GitHub/GitLab and Docker.

Frontend Developer (June 2021 – July 2022)

- Developed user interface components and enhanced application usability.
- Fixed UI/UX issues and improved cross-browser consistency.
- Participated in testing and code reviews to maintain software quality.

Notable Projects

ResuMatch AI – AI Resume Analyzer Web Application

Technologies: React (TypeScript), Vite, Tailwind CSS, Puter.js

Secure Notes – End-to-End Encrypted Notes Application

Frontend: React.js, Tailwind CSS, Vite | Backend: Golang

Skills & Tools

Languages: TypeScript, JavaScript (ES6+), Python, Java, Go, PHP

Backend: NestJS, Django, Django REST Framework, FastAPI, Node.js, REST APIs, Microservices

Frontend: React, Next.js, Vue.js, Bootstrap, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, Supabase, SQL, AI & Voice

Technologies: LLM Integration, Vapi, Ultravox, ElevenLabs, Twilio

Infrastructure & DevOps: Docker, Git, GitHub, GitLab CI/CD, AWS

Observability: Sentry, Grafana Loki, Monitoring, Structured Logging

Practices: API Design, System Design, Agile/Scrum, Unit Testing, Performance Optimization

Education

- Bachelor of Science in Computer Science
  - University of the Philippines-Cebu (2018-2022)
